

A Comprehensive Health Analysis Report

AI Based Personalized Diagnostic Report for You

Booking ID :	ORD-E1BE9C
Patient Name :	Mudabir
Age / Gender :	undefined Yrs / Male
Collection Date :	25-Jun-2026
Report Status :	Final Report

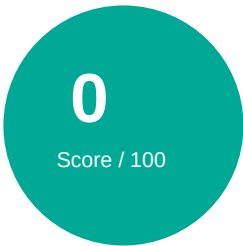

HEALTHKANGAROO CREDIBILITY ASSURED

HEALTH SUMMARY & VITALS

Hello Mudabir ,

We have successfully analyzed your diagnostic samples. Below is your dynamic body ecosystem health score card:

Key Parameters Status

Serum Creatinine	2 mg/dl	Concern
GFR, ESTIMATED	32 mL/min/1.73m2	Concern
Serum Uric Acid	32 mg/dl	Concern
Serum Calcium	213 mg/dl	Concern
Serum Phosphorus	2 mg/dl	Concern
Serum Sodium	42 mmol/L	Concern
Serum Chloride	3 mmol/L	Concern

DETAILED CLINICAL REPORT

TEST PARAMETER	VALUE	UNIT	REFERENCE INTERVAL	STATUS
KIDNEY FUNCTION TEST ADVANCE (KFT)				
Serum Creatinine	2	mg/dl	0.3 - 1	High/Low
GFR, ESTIMATED	32	mL/min/1.73m ²	90 - 150	High/Low
Serum Uric Acid	32	mg/dl	2.6 - 6	High/Low
Serum Calcium	213	mg/dl	8.8 - 10.6	High/Low
Serum Phosphorus	2	mg/dl	2.5 - 4.5	High/Low
Serum Sodium	42	mmol/L	136 - 146	High/Low
Serum Chloride	3	mmol/L	101 - 109	High/Low
Blood Urea	434	mg/dl	17 - 43	High/Low
Blood Urea Nitrogen (BUN)	34	mg/dl	8 - 20	High/Low
Bun/Creatinine Ratio	3	Ratio	10 - 20	High/Low
Urea/Creatinine Ratio	43	Ratio	20 - 30	High/Low
LIPID PROFILE				
Total Cholesterol	43	mg/dL	100 - 200	High/Low
Serum Triglycerides	43	mg/dl	50 - 150	High/Low
Serum HDL Cholesterol	43	mg/dl	40 - 60	Normal
LDL Cholesterol	3	mg/dl	50 - 100	High/Low
VLDL Cholesterol	3	mg/dl	5 - 30	High/Low
Total CHOL / HDL Cholesterol Ratio	53	Ratio	3.3 - 4.4	High/Low
LDL / HDL Cholesterol Ratio	43	Ratio	0.5 - 3	High/Low

TEST PARAMETER	VALUE	UNIT	REFERENCE INTERVAL	STATUS
HDL / LDL Cholesterol Ratio	43	Ratio	0.4 - 1	High/Low
Non-HDL Cholesterol	33	mg/dl	- 160	Normal
LIVER FUNCTION TEST (LFT)				
Serum Bilirubin, (Total)	3	mg/dl	0.3 - 1.2	High/Low
Serum Bilirubin, (Direct)	43	mg/dl	- 0.2	High/Low
Serum Bilirubin, (Indirect)	44	mg/dl	- 0.8	High/Low
Aspartate Aminotransferase (AST/ SGOT)	33	U/L	3.0, - 35	Normal
Alanine Aminotransferase (ALT/ SGPT)	4	U/L	3 - 35	Normal
Alkaline Phosphatase (ALP)	55	U/L	33 - 98	Normal
Gamma Glutamyl Transferase (GGT)	55	U/L	5 - 38	High/Low
Serum Total Protein,	43	gm/dl	6.6 - 8.3	High/Low
Serum Albumin	34	g/dl	3.5 - 5.2	High/Low
Serum Globulin	3	gm/dl	3 - 4.2	Normal
Albumin/Globulin Ratio	2	Ratio	1.2 - 2.5	Normal
SGOT/SGPT Ratio	1	Ratio	0.7 - 1.4	Normal

CLINICAL INTERPRETATIONS & NOTES

KIDNEY FUNCTION TEST ADVANCE (KFT)

Assessment of renal function is vital in identifying the presence of renal disease, monitoring therapeutic responses, and determining the progression of chronic kidney disease (CKD). Urea is synthesized in the liver as the final product of protein and amino acid metabolism, depending heavily on daily dietary protein intake and endogenous protein catabolism. Creatinine is a metabolic product of creatine/phosphocreatine found almost exclusively in skeletal muscle, making its clearance rate a primary marker of glomerular filtration.

LIPID PROFILE

Dyslipidemia is a metabolic disorder of fats or lipoproteins in the body, involving either overproduction or deficiency of circulating lipid fractions. Cholesterol is a vital steroid necessary for cell membrane integrity and acts as a precursor to bile acids, Vitamin D, and steroid hormones. High-Density Lipoprotein (HDL) is inversely related to Coronary Heart Disease (CHD) risk and is commonly termed "good cholesterol" as it transports cholesterol away from arteries back to the liver.

LIVER FUNCTION TEST (LFT)

Bilirubin is a yellowish pigment found in bile and is a breakdown product of normal heme catabolism. Elevated levels result from increased bilirubin production (e.g., hemolysis and ineffective erythropoiesis), decreased bilirubin excretion (e.g., biliary obstruction and hepatitis), and abnormal bilirubin metabolism. Conjugated (direct) bilirubin is elevated more than unconjugated (indirect) bilirubin in viral hepatitis, drug reactions, alcoholic liver disease, or structural blockages of the bile ducts like gallstones or scarring.

SUGGESTED ADVISORY & DO'S/DONT'S

Suggested Nutrition Do's

- Have a balanced diet that includes whole grains, pulses, dairy, and healthy fruits.
- Prioritize hydration and balanced nutrition to support kidney health.

Suggested Lifestyle Do's

- Maintain ideal weight and have regular physical activity of 30 mins daily.

Suggested Future Follow-Up Tests

- Kidney Function Test - Every 3 Month
