HEALTH SUMMARY & VITALS

Hello Heeraaa laal,

We have successfully analyzed your diagnostic samples. Below is your dynamic body ecosystem health score card:

Key Parameters Status

Serum Creatinine	mg/dl	Concern
GFR, ESTIMATED	mL/min/1.73m2	Concern
Serum Uric Acid	mg/dl	Concern
Serum Calcium	mg/dl	Concern
Serum Phosphorus	mg/dl	Concern
Serum Sodium	mmol/L	Concern
Serum Chloride	mmol/L	Concern

DETAILED CLINICAL REPORT

TEST PARAMETER	VALUE	UNIT	REFERENCE INTERVAL	STATUS
KIDNEY FUNCTION TEST ADVANCE (KFT)				
Serum Creatinine		mg/dl	0.3 - 1	High/Low
GFR, ESTIMATED		mL/min/1.73m ²	90 - 150	High/Low
Serum Uric Acid		mg/dl	2.6 - 6	High/Low
Serum Calcium		mg/dl	8.8 - 10.6	High/Low
Serum Phosphorus		mg/dl	2.5 - 4.5	High/Low
Serum Sodium		mmol/L	136 - 146	High/Low
Serum Chloride		mmol/L	101 - 109	High/Low
Blood Urea		mg/dl	17 - 43	High/Low
Blood Urea Nitrogen (BUN)		mg/dl	8 - 20	High/Low
Bun/Creatinine Ratio		Ratio	10 - 20	High/Low
Urea/Creatinine Ratio		Ratio	20 - 30	High/Low

CLINICAL INTERPRETATIONS & NOTES

KIDNEY FUNCTION TEST ADVANCE (KFT)

Assessment of renal function is vital in identifying the presence of renal disease, monitoring therapeutic responses, and determining the progression of chronic kidney disease (CKD). Urea is synthesized in the liver as the final product of protein and amino acid metabolism, depending heavily on daily dietary protein intake and endogenous protein catabolism. Creatinine is a metabolic product of creatine/phosphocreatine found almost exclusively in skeletal muscle, making its clearance rate a primary marker of glomerular filtration.

SUGGESTED ADVISORY & DO'S/DONT'S

Suggested Nutrition Do's

- Have a balanced diet that includes whole grains, pulses, dairy, and healthy fruits.
- Prioritize hydration and balanced nutrition to support kidney health.

Suggested Lifestyle Do's

- Maintain ideal weight and have regular physical activity of 30 mins daily.

Suggested Future Follow-Up Tests

- Kidney Function Test - Every 3 Month
